## STATE OWNER NEWSLETTER

### *Corporate Office*

Hello from the corporate office! We want to congratulate Adam Howard and his wife Danielle on their new adventure: being the city owner for the South-Eastern Idaho area and the State Owner for Idaho. Adam is running his crew of employees and doing a great job for our area. He has left the corporate office and is on his way being a great asset to the Heaven's Best business on a new level.

Bill, Nick and Ian are running the warehouse and doing an excellent job filling orders, so we are in good hands.

John, Linda, Ian are still working hard to keep the day-to-day workings of the office running smoothly. Holly is working part time from home. Cody would want us all to move on and keep making Heaven's Best a great company. We appreciate all of you and hope the best for you.

We know things the past 6 months have been CRAZY. We are doing our best to keep up with the legal matters. I know we keep saying it but it is unbelievable all the legal things that must be worked out, signed and resigned when the owner of a company passes away. Please keep the faith and keep being patient as we continue to work things out. We realize it is frustrating and not all calls and emails are answered in the manner some of you would like, but we truly are doing our best. These things take time and we are at the mercy of every attorney and accountant who is working from their own time frame. We waited 2 weeks to get some answers we needed.

### *City Operators*

As you know, the business is for sale and we have interested parties who will hopefully be a good fit for the business. Your patience and help during this transition is important and we are doing our best to make sure orders are sent out on time while also trying to keep up with back orders. We have had some problems getting motors for our upholstery units, but we hopefully have that worked out. We really are doing all we can here at the corporate office to keep up with all the work Cody took care of. It is *amazing* to all of us how he could keep so many irons in the fire at once.
